SKILLS

- **Programming Languages:** C++, C, Python
- **Full-Stack Engineering:** Backend (Node.js, FastAPI, REST APIs) + Frontend (React.js, JavaScript ES6+, HTML5/CSS3, Tailwind CSS)
- **Databases:** MySQL, MongoDB
- **Core Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
- **Systems & Tools:** Linux (CLI), Git, Docker
- **Engineering Focus:** Scalable System Design, API Architecture, Performance Optimization
- **Professional Skills:** Problem Solving, Analytical Thinking, Collaboration, Communication, Agile Practices

PROJECTS

- **reBorn_i — Hiring Probability Intelligence Platform** | [🔗](#) Jan' 2025 – Apr' 2025
 - Designed a hiring pipeline simulation engine modeling **ATS, recruiter, and market stages**, computing interview probability using deterministic risk scoring.
 - Built a full-stack system enabling **resume parsing, job matching, and stage-wise rejection analysis**, providing actionable insights for optimization.
 - Implemented survival-based probability models and **skill ROI simulation**, identifying bottlenecks and improving decision-making for job seekers.
 - Optimized performance by replacing heavy ML pipelines with **embedding-based similarity + fallback mechanisms**, improving efficiency and system reliability.
 - Tech:** Next.js, TypeScript, FastAPI, PostgreSQL, Embeddings
- **CARE (Customer Autonomous Resolution Engine) AI Agent** | [🔗](#) Mar' 2025 – June' 2025
 - Engineered an agentic AI system performing **end-to-end support ticket resolution** using multi-step reasoning and tool orchestration
 - Implemented asynchronous execution pipeline enabling **concurrent ticket processing**, significantly reducing response latency
 - Designed robust failure-handling mechanisms (**retry, fallback, escalation**) ensuring reliability under uncertain conditions
 - Achieved **100% autonomous resolution across test scenarios (20/20 tickets)**, demonstrating potential for large-scale support automation
 - Tech:** Python, Async Processing, LLM Integration, LangChain / Custom Agent Loop

CERTIFICATES

- Certificate in Cloud Computing by IIT Kharagpur | [🔗](#) Jul' 2025
- Certificate in Build Generative AI Apps and Solutions by Infosys | [🔗](#) Aug' 2025
- Certificate in Master Generative AI & AI Tools by Infosys | [🔗](#) Aug' 2025
- Certificate in The Bits and Bytes of Computer Networking by Google | [🔗](#) Sep' 2024
- Certificate in Data Structures & Algorithms (DSA) | [🔗](#) Dec' 2024

EXTRACURRICULAR ACTIVITIES

- **WEB-A-THON 2.0 | Top 5 Finalist** feb' 2026
 - Led a 4-member team in a 24-hour university-level hackathon to develop a web-based learning platform using React.js, FastAPI, and REST APIs. Recognized for rapid prototyping, system design, and collaborative execution.
- **CODE-A-HUNT | Team Leader** Mar' 2024
 - Led a 4-member team in building a full-stack coding education platform using the MERN stack with real-time collaboration features and interactive UI design.

EDUCATION

- **Lovely Professional University** Punjab, India
 - Bachelor of Technology - Computer Science and Engineering; Since Aug' 2023
- **Mount Egmont High School** Hazaribagh, India
 - Intermediate Apr' 2022 – Mar' 2023
- **St. Augustine High School** Hazaribagh, India
 - Matriculation Apr' 2020 – Mar' 2021
